

Description

CM1-PR Indicator has been designed in simple function and 4 digital 20.0mm LED displays with economic cost.

They can be programmed by tact switches that are hidden in backside of front bezel.

They are also available option of 2 Relay outputs, 1 Analogue output or 1 RS485(Modbus RTU Mode) interface with versatile functions such as control, alarm, re-transmission or communication for a wide range of industrial applications.

Features

- Measuring 0(1)~5V/0~10V, 0~10mA/0(4)~20mA (or 2 wire sensor with 24Vdc excitation supply)
- Optional DC24V excitation power for 2 wire sensor
- The operation buttons are built-in to prevent users from arbitrary operation or incorrect setting, which may cause abnormal operation of the equipment
- The display value can be adjusted slightly with the "field measurement signal"
- The output can option relays or analog output or RS485 (Modbus RTU mode)
- Relay function in addition to start delay, active delay, delay off and active hold
- Analog output voltage signal range can be switched (0~10V/0~5V/1 ~5V) or current signal range can be switched (0~10mA/0~20mA/4~20mA)
- The analog output signal is free to set the corresponding display range (Span-50%) and can be fine-tuned on-site
- On board terminal design, no quality issue; installation depth is only 72mm

Applications

- 2 wire sensing transducers as like as pressure, level and so on...
- Process alarm or communication for data collection.

Ordering Information

CM1-PR		Input Signal	Output Option	Excitation Supply	AUX. Power
CODE	Input Range	CODE	Output Option	CODE	Excit. Supply
A2	0 ~ 10mA	N	None	N	None
A3	0 ~ 20mA	R2	2 Relay	E24	DC 24V
A4	4 ~ 20mA	I	Analog current output: (0)4~20Ma 0~10mA		
V4	0 ~ 5V	V	Analog voltage output: 0~10V (0)1~5V		
V5	0 ~ 10V	8	RS485(Modbus RTU)		
V5M	0 ~ 10V				
V6	1 ~ 5V				

The DC 24V aux. power can only be a pure display meter and cannot be equipped with additional function and excitation supply output.

Installation

The meter should be installed in a location that does not exceed the maximum operating temperature and provides good air circulation.

Pin Assignment

Terminal blocks:

20A/300Vac, M3.5, 0.5~2.0mm²(22~14AWG)

⚠ Please check the voltage of power supplied first and then connect to the specified terminals. It is recommended that power supplied to the meter be protected by a fuse or circuit breaker.
